P.U.C. (C)

Letter No. 6093/32, dated the 2nd May 1933, from the President, Munl. Commission, C.& M. Station, Bangalore.

Encl XI to S.N.1 Collection (C) ✓

In 1923 an agreement was concluded for a period of 10 years between the Municipal Commission, C.& M. Station, Bangalore, and the Govt. of Mysore, regarding the electric lighting of the Station. This agreement expired on the 1st January 1933. In the New Agreement to be made the Municipal Commission propose to add the following:-

Proviso to the existing clause 2.

"Provided that 20 % of the new lights installed shall be slung lights, if the consumer so desires"

S.N.1 (C) ✓

Clause 2-A.

"The Supplier shall not use wooden posts for the additional lights to be installed from and after the date of this agreement".

The Chief Electrical Engineer to the Govt. of Mysore has not agreed to embody the above two additions in the Agreement. The Munl. Commission at their ordinary meeting held on the 27th April 1933 resolved that the Mysore Govt. should be addressed in the matter.

Encl X to S.N.1 ✓ Collection

If approved, a copy of the P.U.C. may be sent to the Mysore Government for favourable consideration.

Draft submitted for approval.

(4) Was the 1923 agreement the result of negotiations between this Residency & the Durbar & if so was it drawn up quickly & amicably & if not why?

vide S.N. 329, 330, 335, 336, 339, 340, 345, & 348 (5) & F.543-01 Coln: (K)

The 1923 agreement was the result of negotiations between this Residency and the Durbar.

(6) 323 & (K) & 31st Dec: 1922 & S.N 348/a & (K)

Negotiations regarding the 1923 agreement ~~was~~ were started by the Municipal Commission in June 1922 i.e. six months in advance of the date of expiry of the then agreement. The agreement was however formally executed only in October 1923 i.e. more than nine months after the expiry of the previous agreement.

(7) S.N 323, 330 & 334 & (K)

The original agreement drawn up by the Municipal Commn. in June 1922 was revised by the Govt. of Mysore and recd. back in Jany. 1923. The agreement thus revised by the Govt. of Mysore was amended by the Municipal Commission in March 1923. These amendments were accepted by the Government of Mysore with certain alterations vide paragraph 1 of their letter of May 1923. The agreement as finally revised was accepted by the Municipal Commission in June 1923. The further delay in formally executing the agreement was due to the time taken in obtaining the sanction of the Government of India for the provision embodied in the agreement by the Government of Mysore for the installation and maintenance of departmental telephones necessary to efficiently operate the system of lighting in the Station - vide S.N.342 and 344.

S.N. 336 & (K)

S.N 338 -do-

& (K)

(8) It will be seen from the above that the 1923 agreement

agreement was drawn up amicably. The delay was unavoidable.

(from para 1)

Resident

I agree that this correspondence should have been conducted through this office.

So far as I can understand if we address the Durban as proposed we shall be referring to them again questions which have already been the subject of considerable correspondence between the Cork Studies Municipality & the Chief Electrical Engineer, Supreme Court, & in regard to which neither side appears to be inclined to give way. I think we should try to determine whether the Commrs or the Durban are right in their contentions; & I am inclined to think that the best line of action would be for us to discuss the points at issue first with the Chief Electrical Engineer, Mr., & afterwards, if necessary, with him & the Commrs.

L.I.

Collection C

From the correspondence that passed between the -- President, Munl. Commission and the Chief Electrical -- Engineer (and in view also of the technical nature of the subject,) it is difficult to determine whether the President, Munl. Commission, or the Chief Electrical -- Engineer is correct in his contentions . The best -- course in the circumstances seems to be to suggest to the Mysore Government a via media. The President, Munl. Commission, may be asked not to press his objection to the use of wooden poles in view of the assurance given by the Chief Electrical Engineer that only straight poles will be used. If the President, Munl. Commission, agrees to this, we may try to prevail upon the Mysore -- Government to withdraw on their part the Chief Electrical Engineer's objection regarding slung lights.

En. V to S.N.1
Collection C

If approved, the file may be sent U.O. to the President, Munl. Commission, for remarks with a copy of the -- relevant portions of thse notes. On receipt of his -- reply, a draft to the Mysore Government will be submitted.

G. H. COOKE, ESQ., M. C., I. C. S.,
President, Municipal Commission,
C. & M. Station, BANGALORE.

To

OFFICE OF THE RESIDENT IN MYSORE.
BANGALORE.
4 MAY 1933
Regd. No. 4007
File No. 262/33 SIR,

The Secretary to the Hon'ble the Resident in Mysore,
Bangalore.

5431/31. Recd 13.5.33

Renewal of the Electrical Agreement with the Government of Mysore.

I have the honour to forward, herewith, a copy of the Commission's resolution No.5, dated the 17th December 1932, proposing the following additions in the Electrical Agreement to be entered into with the Government of Mysore and copies of the subsequent correspondence on the subject between this office and the Chief Electrical Engineer with the Government of Mysore:- Encl. I

Proviso to the existing clause 2.

"Provided that 20 % of the new lights installed shall be slung lights, if the consumer so desires."

Clause 2-A.

"The Supplier shall not use wooden posts for the additional lights to be installed from and after the date of this agreement."

2. The Chief Electrical Engineer does not agree to embody the above two additions in the New Agreement on the following grounds:-

(1) that, at present, steel poles are very costly being 2 or 3 times as costly as wooden poles that are being used and that as long as continuity of service was given to us, it should not matter whether wooden or steel poles were used.

(2) that if slung lights are required extra rate of royalty at Rs.40/- per light per annum against Rs.35/- per annum for the ordinary 60 C.P. lights should be paid as the capital cost involved in providing slung lights is more than that required for the installation of overhead lights.

3. On the other hand we pointed out to the Chief Electrical Engineer that wooden poles were unsightly(1), never straight(2) as in other countries, and liable to attack from white ants(3). It was also pointed out that reinforced cement concrete posts would not cost more than wooden ones. As regards slung lights, it was pointed out that their installation costs less than the installation of new ordinary lights, a considerable length of copper wire and many poles having to be used for the installation of the latter in the extensions and villages of the Station, whereas slung lights were always required to be fixed where wires already existed.

4. Inspite of the explanations, the Chief Electrical Engineer did not, however, agree to embody the two additions in the New Agreement. The matter was, therefore, placed before the Commission at their ordinary meeting held on the 27th April 1933 when it was resolved that the Mysore Government should be addressed in the matter - vide copy of resolution No.4, dated the 27th April 1933 enclosed. I request that the Hon'ble the Resident may be pleased to address the Government of Mysore accordingly and request them to consider the Commission's proposals favourably. A copy of the agreement which expired on the 1st January 1933 is enclosed for reference. Encl X1

I have the honour to be,
Sir,
Your most obedient servant,

27.V.33

President, M. C.

MVL.

5. Renewal of the Electrical Agreement with the Government of Mysore.

Recommended subject to the omission of clause 4 and provision being made for the following in the new agreement:-

(a) 20 % of the new lights to be installed to be slung lights.

(b) Discontinuance of the use of wooden poles.

Resolved that the renewal of the Electrical Agreement with the Government of Mysore be approved subject to the omission of clause 4 in the existing agreement and the addition of the following in the new agreement as proviso to the existing clause 2 and as clause 2-A respectively:-

Proviso to the existing clause 2.

"Provided that 20 % of the new lights installed shall be slung lights, if the consumer so desires."

Clause 2-A.

"The Supplier shall not use wooden posts for the additional lights to be installed from and after the date of this agreement."

(File No.303 of 1903).

End. II

Letter No.6093/32 dated the 20th December 1932, from the President, Municipal Commission, Civil and Military Station, Bangalore, to the Chief Electrical Engineer to the Government of Mysore, Bangalore.

Agreement for the street lighting of the Civil and Military Station, Bangalore.

With reference to your letter No.78264 dated the 27th August 1932 and subsequent reminder No.80915 dated the 16th November 1932, on the above subject, I have the honour to inform you that the Municipal Commission at their ordinary meeting held on the 17th December 1932, have agreed to the renewal of the Electrical agreement with the Government of Mysore subject to the omission of clause 4 in the existing agreement and the addition of the following in the new agreement as proviso to the existing clause 2 and as clause 2-A respectively:-

End. I

Proviso to the existing clause 2.

"Provided that 20 % of the new lights installed shall be slung lights, if the consumer so desires."

Clause 2-A.

"The Supplier shall not use wooden posts for the additional lights to be installed from and after the date of this agreement."

2. The new agreement may be drafted accordingly and sent my signature.

3. Although no specific provision in the new agreement has been suggested in regard to the type of lamp shades to be used for the new lights to be installed from and after the date of the new agreement, I request you kindly to arrange to provide all the new lights to be installed ~~installed~~ in the station with shades such as those provided for the lights on South Parade between St. Mark's road and Brigade road.

Encl. III

Letter No.82534 dated the 4th January 1933, from the Chief Electrical Engineer to the Government of Mysore, Bangalore, to the President, Municipal Commission, Civil and Military Station, Bangalore.

Agreement for the street lighting of the Civil and Military Station, Bangalore.

Encl. II

With reference to your letter No.6093/32 dated the 21st December 1932, I have the honour to inform you that proviso to the existing clause No.2 of the Agreement, as suggested, cannot be agreed upon as extra rate will have to be paid for the slung lights in case you need them. All 60 C.P. lights will be of the over-head type and if slung lights are required extra rate of royalty @ Rs.40/- per light per annum will have to be paid as the capital cost involved in providing slung lights is more than that required for the installation of overhead lights.

Clause 2(a) also cannot be incorporated in the Agreement as steel poles at present are very costly nearly being 2 or 3 times as costly as the wooden poles that are being used. As long as continuity of service is given to you I think it matters very little whether wooden poles are used or steel poles are used as far as you are concerned. Perhaps, you are aware of the fact that all Distributing Companies all over the World are adopting wooden poles properly creosoted for distribution as well as for transmission line purposes, as they have found them much cheaper and very reliable and more than all they require no guying in small corners which means obstruction to traffic is lessened.

Hence, I hope you agree with me on the above points and on hearing from you I shall send the agreement for your signature and return.

Encl. IV

Letter No.6093/32 dated the 14th January 1933, from the President, Municipal Commission, Civil and Military Station, Bangalore, to the Chief Electrical Engineer to the Government of Mysore, Bangalore.

Agreement for the street lighting of the Civil and Military Station, Bangalore.

Encl. III

With reference to your letter No.82534 dated the 4th January 1933, objecting to embody in the new Electrical Agreement the two additions proposed in my letter No.6093/32

Encl. II

dated the 20th December 1932 in respect of slung lights and wooden poles, I have the honour to state that, if slung lights are to be of 100 C.P., the Municipal Commission may not object to the rate of Rs.40/- per light per annum, but if they are to be of the ordinary 60 C.P., Rs.40/- per light is too high as the cost involved in providing a slung light would not be very much.

As regards the use of wooden poles, I can only speak from experience of the poles fixed by your department. They are unsightly, never straight as in other countries and liable to attack from white ants. Reinforced cement concrete posts would not cost more than wooden ones.

In the circumstances, I hope you will agree to embody the two additions in the new agreement.

Encl. V

Letter No.83108 dated the 25th January 1933, from the Chief Electrical Engineer to the Government of Mysore, Bangalore to the President, Municipal Commission, Civil and Military Station, Bangalore.

Subject:- Agreement for the street lighting of the Civil and Military Station, Bangalore.

Encl. IV

With reference to your letter No.6093/32 dated the 14th January 1933, I have the honour to inform you that it is not possible to give slung lights at the usual rates of royalty. As already intimated, if the Municipal Commission is agreeable to pay Rs.40/- for a 60 C.P. ordinary light of slung type, the same will be embodied in the agreement.

As regards the wooden poles, I may inform you that only straight poles will be used. The poles being creosoted with coal tar as is done every-where, they are least liable to be attacked by white-ants. Hence, I hope you will not insist on these two conditions being incorporated in the agreement.

Encl. VI

Letter No.6093/32 dated the 14th February 1933, from the President, Municipal Commission, Civil and Military Station, Bangalore, to the Chief Electrical Engineer to the Government of Mysore, Bangalore.

Agreement for the street lighting of the Civil and Military Station, Bangalore.

Encl. V

With reference to your letter No.83108 dated the 25th January 1933, on the above subject, I have the honour to state that I do not think that the Municipal Commission should be called upon to pay anything extra for slung lights. As a matter of fact, the installation of slung lights costs* less than the installation of new lights in the extensions and villages of the Station. A considerable length of copper wire and many poles have to be used for each new light installed in those localities, whereas slung lights are always required to be fixed where wires already exist.

vide letter No.6093/32 dated the 28th February 1933.

Encl. VIII infra

The average cost of installing a slung light is Rs.60/- and that of installing an ordinary street light must be at least Rs.100/-. In the circumstances, it would appear that the Commission should be charged less for slung lights than for the ordinary street lights.

As regards the use of wooden poles, I still consider that they are most objectionable for the main roads in the Station. I have not seen a single straight pole in the Station yet.

Encl VII

Letter No.84193 dated the 20th February 1933, from the Chief Electrical Engineer to the Government of Mysore, Bangalore, to the President, Municipal Commission, Civil and Military Station, Bangalore.

Agreement for the street lighting of the Civil and Military Station, Bangalore.

Encl. VI

With reference to your letter No.6093/32 dated the 14th instant, I have the honour to observe as follows:-

Your comparison between the cost involved in the erection of a slung light and an ordinary over-head street light does not appear to be in order as comparison in cost has to be made for different lights to be installed at the same place. Hence, my statement, that if a street light has to be fixed in a particular place the cost involved in putting slung light is much higher than necessary for installing an ordinary overhead light, is correct. Therefore, the royalty payable on a slung light has been fixed at a higher rate than for the ordinary type of light.

I hope you will agree to sign the agreement introducing this clause agreeing to pay a higher rate of royalty for the slung light to be installed in future.

As regards the use of wooden poles, I am sorry to say that we are unable to use steel poles as they are very costly. As already intimated, we will try our best to use as straight a pole as possible. As these poles are creosoted, they are not liable to be attacked by white ants and as they obviate the necessity of fixing the guys, etc., their existence, I think, adds to the safety of the roads.

Existing Electrical Agreement with the Government of Mysore.

AN AGREEMENT made the sixteenth day of October One thousand nine hundred and twenty three BETWEEN the Chief Electrical Engineer to the Government of Mysore (Hereinafter called the Supplier) of the one part AND the Municipal Commission of the Civil and Military Station of Bangalore (Hereinafter called the Consumer) of the other part. WHEREAS the Supplier has agreed to supply power to the Consumer and the Consumer has agreed to take from the Supplier, Electrical power for the purpose of illuminating the streets within the Municipal limits of the Civil and Military Station, Bangalore, for the period and upon the terms and conditions hereinafter provided, it is hereby agreed between the parties hereto as follows:-

1. This Agreement shall commence from the first day of January 1923 on which the existing agreement dated the 3rd March 1908 terminates and shall continue for a further period of ten years therefrom.

2. The Supplier agrees to instal and to maintain all lines, lighting fixtures, and other plant, necessary to efficiently operate the system of street lighting, now existing in the Civil and Military Station as per plan annexed showing the approximate number and distribution of lights, as they stood on the 31st December 1922 and such extensions as may be required by the Consumer during the period of this Agreement ~~(subject to clause 2-A infra at the cost of the Supplier)~~, including all renewal of lamps and other plant, the illuminating power of all lamps being between 40 and 60 standard C.P., as the situation of the lamps demand.

Provided that 20 % of the new lights installed shall be slung lights, if the consumer so requires.

Additions suggested to the new agreement vide M. C's resolution No.5, dated 17th December 1932.

2-A. The Supplier shall not use wooden posts for the additional lights to be installed from and after the date of this agreement.

3. That payment shall be made by the Consumer in two half-

Encl. I

yearly instalments at an average rate of Rs.35/- per lamp per annum on all the street lights installed to the ~~2nd~~ end of 31st December 1922 and at Rs.35/- per lamp per annum on all additional lights installed on and after the 31st January 1923. The two half-yearly payments are to be made to the Supplier at Bangalore, each instalment being payable either during the currency of the half year, to which it relates, or within one month after the receipt of the accounts from the Supplier for the said half year. Any period may be selected as the half year, which cannot again be changed without the previous consent of both parties hereto.

Omission suggested in the new agreement- vide M.C:s resolution No.5) dated the 17th December 1932.

4. That the number of additional lights to be installed on and after the 1st January 1923 shall not average less than 50 lights per annum during the first five years of this agreement and they shall be installed at the cost of the Supplier, as provided in para 2 supra.

End. I

5. That the Consumer shall take all reasonable precautions within his power to prevent injury or damage to the poles, wires, insulators and all other plant of the Supplier situated within the Civil and Military Station limits.

6. That the hours during which illumination of the street lighting system will be maintained shall be from sunset every day to 5-30 A.M. on the day following, which interval is herein referred to as night.

7. That no change in the position of any lamp once installed and no deviation, extensions or alteration of any kind whatsoeve shall be made or permitted by the Consumer without the sanction of the Supplier previously obtained.

8. That in the event of any change in the position of a newly added lamp appearing desirable, the Supplier shall at the request of the Consumer carry out the same, free of cost, subject to the conditions that the request shall be preferred within a period of six months from the date of starting service to the lamps affected and that the total number of lamps so removed from the position originally occupied shall not exceed

5 per cent of the total number of lamps newly installed for the next higher whole number of lamps in the entire system, and that the distance, which such lamps are to be so removed shall not exceed 100 yards in any direction from the original position. Further that any such alterations, preferred after the period of six months from the date of first starting service to those lamps shall be carried out at the mutual consent of the Supplier and the Consumer and at the entire cost of the Consumer.

9. That the Supplier shall take all reasonable precautions to ensure continuity of service but will not in the event of an interruption from any cause be liable for any loss arising out of such interruptions and that the Supplier will give the Consumer timely notice of the probable duration of any interruption and endeavour, by every possible means to minimise the period of such interruption.

10. That in the event of the illumination of the street lighting system being suspended by reason of an interruption to the power supply or by reason of any other cause, a rebate of payment will be allowed to the Consumer by the Supplier, calculated at 1/365th part of the annual payments, mentioned in para 3 supra, for each night the street lighting system remains unilluminated, provided that no rebate shall be claimed by the Consumer for an interruption of the service unless such interruption extends to one full continuous night in each case, fractions of a night not being counted.

11. That, subject to the aforesaid terms and conditions, this agreement shall remain in force and be binding upon both the parties hereto for a full term of ten years from 1st January 1923 to the 31st December 1932.

12. That if at any time within three years previous to the expiry of the said term of ten years, the Consumer or the Supplier prefer by a written request from one party to the other, for a renewal of this Agreement, then the same shall be renewed upon such terms and conditions and with modifications if any, as

may then be mutually agreed upon by the parties hereto.

IN WITNESS WHEREOF the Supplier, as representing the Government of Mysore, has hereto set his hand and seal the day and year first above written and this agreement has been sealed with the common seal of the Municipal Commission and signed by the President and one other Commissioner and countersigned by the Secretary, as the Consumer, in accordance with Section 36 of the Bangalore Municipal Law, 1897, the day and year first above written.
